The Total Medicaid population for 1996-2003 was collected by States at the same time the managed care enrollment numbers were collected instead of using 2082 data as in previous years. These figures represent point-in-time enrollment as of June 30th for each reporting year. The unduplicated managed care enrollment figures include enrollees receiving comprehensive benefits and limited benefits. This table also provides unduplicated national figures for the Total Medicaid population and Other population. The statistics also include individuals enrolled in State health care reform programs that expand eligibility beyond traditional Medicaid eligibility standards.
